

**Tour at Keno Hill Silver District
with
J.V.Clark students**

On May 15, 2009, the J.V.Clark grade 11 and 12 chemistry class students and their teacher Michael McGinnis joined Bill Slater, Eddie Hager and me for a site tour of the Keno Hill Silver Mine district formerly known as UKHM (United Keno Hill Mines).

We started the day at the school with a short presentation about chemistry and mining remediation, shortly after, our driver Eddie Hager came to pick up everyone with our passenger van and we were on our way to Elsa.

Once in Elsa and met with Alexco and ERDC. We were welcomed by Andrea Mansell who was very friendly as always and she directed us to our safety briefing with safety officer Colleen Geddes. After the safety briefing, we followed Rob Schneider to the Laboratory for a discussion about chemistry, water sampling, water treatment and water management.

Shortly after, our host and guide Rob McIntyre took us for an informative site tour around Keno and Elsa. We went to look at the Bellekeno adit and associated plant.

On May 10, 2009 a meeting was held at Five Mile Lake to discuss with NND Elders regarding the 2009/ 2010 activities on the forecast. We spoke about the opportunities for NND to tour not only the Keno Hill Mine Site but to be able to visit the Brewery Creek and Faro Mine as well. We started

1. Hazel Phillips, Sarah McDiarmid, Kaylie-Ann Hummel, Blaine Peter, Rob McIntyre and Ethan Allen.

2. Rob Schneider, Michael McGinnis, Mitchell Andre, Edward Hager, Hazel Phillips, Sarah McDiarmid, Blaine Peter, Rob McIntyre and Ethan Allen.

3. Michael McGinnis, Edward Hager, Hazel Phillips, Sarah McDiarmid, Blaine Peter and Rob McIntyre.

4. Michael McGinnis, Mitchell Andre, Kissel Reid, Bill Slater, Edward Hager, Hazel Phillips, Sarah McDiarmid and Kaylie Ann Hummel.
